dity he found Two Years ago; *viz.* One Hundred and Fifty Pound Weight daſhed on the Shoar at a Place in theſe Parts called *Ambergrieſe Point*, where the *Spaniards* uſually come once a Year to look for it. This vaſt Quantity was divided in Two Parts; ſuppoſed by rolling and tumbling in the Sea; but that which I have to inform you, is the Way how 'tis produced; *viz.* from a Creature, as Honey or Silk; for I ſaw in ſundry Places of this Body, the Beaks, Wings, and part of the Body of the Creature which I preſerved ſome time by me, and this ignorant Fellow (for ſo you would term him if you knew all) has ſeen the Creature alive; and he adds, That he believes they ſwarm as Bees, on the Sea-Shore or in the Sea. This account is very different from what I ever met with, ſo I thought fit to Communicate it. We have lately diſcover'd Two hot Springs. One to Windward, which ſeems Sulphurous: The other to Leeward is very Salt; but as I am told does not partake of Brimſtone, and both very much magnify'd for the Endemick Diſeaſes of theſe Parts, the dry Belly-ach, Pains of the Nerves, and Yaws.

ERRATA. In Numb. 231.

PAG. 642. l. 17. for — (in the Denominator) read +. p. 648. l. 1. for *ab* read *ob*. p. 649. l. 4. for *eluceſſit*, read *eluceſcit*.
